

Please do not allow cell phones inflight! Cell phones in flight would not only enable terrorists to coordinate their efforts more effectively (especially with channel 9 available)but it would also create multiple problems between passengers & crew members. As a Flight Attendant I know first hand that it was already hard enough to have people pay attention to the safety demo before take off & even harder now with passengers not turning off the cell phones when directed to do so thus talking on their phones during the safety demo. I am also concerned that there is not enough data to prove that it would be safe. PLEASE PLEASE say no to cell phones inflight!
